

Your phone poll

Posted by Tunes - 23 May 2011 10:54

Hello folks, just a general matter poll, nothing really important.

When voting, please write the phone brand.

When I mean proprietary, its related to phones without an OS, usually are the ones who can stand longer in battery life and have less features.

Cheers

Iphone 3G S I'm quite happy about it. Never had any problems and can do all the things I want so I don't need anything else unless I break this one 😊
