

## I DO hate this s\*\*\*

For what matters, as a personal opinion, I do hate this CRAP

[en.wikipedia.org/wiki/HP\\_Superdome](http://en.wikipedia.org/wiki/HP_Superdome)

And I have 16 of them to keep working and they are all full of crap!

About this ones, are the the fine cream of technology

[www-03.ibm.com/systems/power/hardware/sy...ghend/595/index.html](http://www-03.ibm.com/systems/power/hardware/sy...ghend/595/index.html)

They are plasma cooled ☹️

The full system runs at processor speed, although it handles 1/4 of the crap HP does, it doesn't need it, as it has several addon cages outside the main cabinet and cloud distributed...

I have 8 of this to make my day...

☹️

This because two of those crappy superdomes just crashed and I have no will power to make them run.. oh well, better do it or else the boss pisses me off ☹️  
But he know that I hate that crap.

yes, it was that stupid dethtrap (blame me, I banned deathtap doooh)

He's banned now and also removed any rights, so he won't come back.

Cannot rollback due to a problem in the bigbrother db.. zeroed it and hopefully its ok now.
