

Photoshop signatures

Posted by slaB - 02 Feb 2009 14:01

Now I have made my first signature, from scratch, with photoshop.

It's quite cool, I must say 😊

And hopefully I'm going to make some more of'em. Ofc, this was made by looking at guides etc, but I think the result was pretty sleek.

Also, post your signatures here if you have every made any, and see what kind of comments you get, either bad or good, it's fun to have people commenting your stuff!

You could also put in requests for signatures, if you know anyone on this forum which is good at making them, hopefully I'm going to get a bit better 😊
