

Problem when launching Audition[Game:P]

Posted by Ncore - 07 Mar 2009 15:06

I get a msg that stand :

Message: data/048.acv Cant` make MapView File! (Init)

Any one knows what that means?

Try searching in their forum:

forum.mmosite.com/general_forum.php

Log in and click Search, then search for something like "data/048.acv";, without the "";.

Also, I did some searching on google, it seems they can't really find a solution for this. Have you tried reinstalling the game?

STFG mate... allways do a STFG

Looks like is a missing file, try reinstaling with antivirus off

Once upon a time there was this site

www.google.com

And I got this

www.urbandictionary.com/define.php?term=stfg
