Aww Froggy 🙄

If you live in the UK and have a lot of money to spare, I recommend PCS xD

Re: My new PC

Posted by Gimp - 04 Jan 2012 23:57

oooo words 🙄
I think I know what a case is, the rest is gibberish but it sounds cool 🙄
...I think

Price? You hadn't beat me though 🙄

=====

Re: My new PC

Posted by Chifilly - 05 Jan 2012 00:54

I doubt I'd beat you Tunes, because you're the PC God! xD

And it was £1340 all together (including labour, special delivery and upgraded warranty, and all the peripherals and stuff), which isn't bad at all, considering it contains 2 high-quality screens, semi-high-quality speakers, a keyboard and mouse, surge protector, upgraded warranty and special delivery xD

Without all that extra stuff (so, just the PC on its own) would come to about £963 (yes, I worked it out 😊)
) which is very cheap indeed. That's all including VAT

nice computer! 😊

I just got new internet provider,

my ping went down from 44 to 28 on the server ^.^

1920 x 1080 is not the native resolution of a 22" screen. Would think it'll be a bit squished. Why not go for 24" screens (native res is 1920x1080), wouldn't be that much more. I would of gone for an ATI card myself :p but it looks like a pretty sweet system. I have would have upped the wattage on the

PSU as well (maybe 700 at least), just to future proof it. It seems like all that would be a pretty heavy load for it even if it was all running idle.
