

## What resolution do you use in CS:S?

Posted by VoGon - 07 May 2009 12:11

---

OK guys, I have a project going for TWK and need to know the resolution at which you guys play.

This is intended to see the most common resolution you all use.

I go first, I play at 1680x1050.

Please answer 😊

Thanks.

1280\*1064 (LCD) as i think it's the biggest my monitor can handle as CS:S doesn't even give me any higher options.

I've never checked before but i've just set it to 1280\*1064 so I'll see how that works out, all it seemed to do was make the text smaller really. I'll take it for a test drive later
