

My new computer (bought)

Posted by slaB - 17 May 2009 22:31

I am going to buy this monster very soon! Looking forward to it, high FPS rate and watching HD films i.e (porn?) 🤔

- Chassis: Antec Performance One P182
- PSU: Chill Innovation CP-700M 700W
- RAM: Corsair XMS3 TWIN3X DDR3-1600 6 GB (3x2GB)
- Motherboard: Gigabyte GA-EX58-UD4P
- CPU: Intel Core i7 920
- Keyboard: Razer Lycosa (Sweetness to a good price)
- HDD: Seagate Barracuda 1 TB
- Monitor: Acer H223HQbmid (HD)
- And a Blu-Ray reader ofc!
- GFX Card: GIGABYTE ATI RADEON HD4890

BTW... is this for a server?! no graphic card?!?!?!? 🤔
Toff.

Lol, forgot to add it as they didn't have the one I wanted in their shop.

But here it is: ATI RADEON HD4890 1G DDR5 (Tweaked, up to 10 % increased performance)

My old comp has exactly the same but in silver, love it cause no tools are needed to assemble anything in it! And its in my livingroom it looks nice and not some metal box ruining the look of the room! And when the lights are out all you see is the front motion LED and side fan lights if its on, cause since its black it isnt the first thing you see in the room 😊

Well, for cases I only have one option.. chieftec, black, big and well made

In the living root, on the office side of (yey) I got these 3g3dnzq8 the ones on the left, one of each, cause I need 6HD's on each machine and incoming one of these 3g3dnzq8 on each one for more 4 HD's, giving 10 on each machine.. yey 😊

Nice machine Slab... somewhere near the summer with upgrade my playstation too. 😊
