I have Linux, enough? 😊

Today we squeezed the tcp/ip stack to the top I've seen

Only 36GByte per second transfer rate on multiple fibers 😊

A coupon on 50\$ is 50\$ in my opinion...

no.

If i was planning on spending 50 euro on buying lets say starcraft 2, i wouldnt be able to do that.

For a person who is not planning on buying a router

\$50 coupon is worthless
