

## Firefox problems

My Firefox is misbehaving, sites take too long to load or wont load at all. When I tested with Internet Explorer 7 it worked perfect. 😊

I like my Firefox so would rather use it than IE7, anyone know what this issue can be?

i loaded in in ff and ie

no difference

i went to url->privat->logga in

it isnt the snappiest of the sites though, took +-5 sec

[www.seb.se](http://www.seb.se) then choose &quot;privat&quot; from the drop menu, cant load the page after that

good luck its in swedish

Yeah, loaded here fast as any other site, but i'm on firefox 3.0.13

Also, i'm a swedish pro
