

TuxGuitar

Posted by Luckie - 03 Dec 2009 02:09

I don't know if anyone here uses music software to help them learn or create songs or whatever but I've found a great alternative to Guitar Pro.

tuxguitar.herac.com.ar/" onclick=">window.open(this.href);return false;

It's an open source tab editor and supports Guitar Pro files - it's brilliant if you don't want to pay for Guitar Pro! 🍷
