

Patented 35 years ago... finally something really new :D

Posted by Tunes - 07 Dec 2009 09:01

Yes, that's right, oled flexible screens are old as computing as we know it, it was first patented by some german guy in the 70's.

The usual human stupidity stated "nah, we are already developing lcd's"

So, sony does it again

[youtube:1shipsr5][/youtube:1shipsr5]

It's funny, I want one
